

Milispec International

Company Profile

John van der Hoeven
Managing Director

Introduction

Milispec International b.v. was founded in 2001 and started as a supplier of specialty oils and lubricants and portable test and analyzing equipment. Milispec products are mostly used for (para) military purposes but some specialty products find their way into the aerospace, medical and oil and gas industry.

After having established a solid market share Milispec International diversified its product scope with fuel infrastructure equipment, ranging from individual equipment items, such as bladder tanks and fuel pumps, to complete solutions.

Based in the Netherlands, Milispec International has grown into the largest supplier of NATO approved oils, lubricants and analyzing equipment to the Royal Netherlands Armed Forces.

Quality

Milispec International is a company dedicated to the delivery of quality goods and services. Our products meet the highest standards customary to military use and other severe operating conditions like the aerospace and off shore industries. In order to maintain and guarantee the quality level of our products we only use ISO-accredited laboratories and production facilities. Our portable sampling and analyzing kits have proven to be durable and easy to use for fuel and quality testing in the field.

Reliability

Doing business with Milispec International means doing business with a reliable partner. Milispec products are key in the proper operation and maintenance of a wide variety of equipments and systems and without these consumables they will eventually fail in their performance. At Milispec International we understand our customer's dependency on our products and we make sure they are at the right location, on the right time and in the right quantities with complementary training and advice if required.

Innovation

We dedicate ourselves in generating new and innovative concepts and products. We combine our own creative concepts with new technologies and products available on the market in order to stay ahead of the changing demands of our customers.

Partnership

At Milispec International we believe in the power of partnerships. By interacting with our customers and suppliers we build long lasting relations and generate solutions which will benefit all.

Milispec International has a strong network of manufacturers and scientific institutes which allow us the offer dedicated solutions instead of just delivering products.

Please feel free to contact us. We are confident we can help you in furthering your business and look forward meeting you.

***Quality, Reliability,
Innovation, Partnership***

Oil and Lubricants

Milispec International's specialty lubricating oils and greases are commonly used for maintenance of land, marine and aerospace systems. Besides special military lubricants in designated packaging we also offer lubricants which are following the latest developments in the market, like lubricating oils for bio gas generators.

Oil and Gas Industry Products

In situations where people have to rely on error free functioning of valves at sub sea or sea level, Milispec International offers special lubricants with excellent sealing capabilities which withstand aggressive fluids and gasses like crude oil condensates and acids. We also offer a full range of environmental safe cleaners and salt water dilutable de-greasers.

Sampling and Analysis Equipment

Milispec International has developed several Quality Control Kits. These kits contain sampling and easy to use analyzing equipment to determine fuel and oil quality. The kits have been ruggedized and are suited to be used under extreme operating, transport and storage conditions. Test Kits have been developed for diesel, kerosene and lubricating oils.

Fuel Storage and Handling Equipment

Milispec International is the distributor of Pronal flexible storage tanks. Pronal's fuel bladders are seamless ensuring a strong and equal level of strength over the whole bladder. Pronal bladders have a long life even under extreme environmental conditions. Bladders are available for the storage of fuel, drinking water and waste water.

Weapon Maintenance Products

Milispec International offers a wide range of weapon cleaning and maintenance products. Milispec's synthetic weapon oil S-761 has excellent cleaning, lubricating and corrosive preventative characteristics. Weapon cleaning systems are available for small calibre weapons to large calibre

weapon systems.
